

2-Day SHORT COURSE

Introduction to modeling of nearshore coastal hydrodynamics and inland floods

24-25 August 2026 | 18 Kent Ridge Road, Singapore

Get an insight into the fundamentals behind computer models used for nearshore coastal hydrodynamics as well as inland floods. Participants will be introduced to various model types and will be given case studies to workshop.

Limited to 20 participants.

Cost S\$750 per person.
